DEPARTMENT OF ENERGY

[OE Docket No. EA-210-C]

Application to Export Electric Energy;
PPL EnergyPlus, LLC

AGENCY: Office of Electricity Delivery and Energy Reliability, DOE.

ACTION: Notice of Application.

SUMMARY: PPL EnergyPlus, LLC. (PPL EnergyPlus) has applied to renew its authority to transmit electric energy from the United States to Canada pursuant to section 202(e) of the Federal Power Act (FPA).

DATES: Comments, protests, or motions to intervene must be submitted on or before [insert date 30 days after date of publication in the *Federal Register*].

ADDRESSES: Comments, protests, or motions to intervene should be addressed to:
Christopher Lawrence, Office of Electricity Delivery and Energy Reliability, Mail Code: OE-20,
U.S. Department of Energy, 1000 Independence Avenue, SW, Washington, DC 20585-0350.
Because of delays in handling conventional mail, it is recommended that documents be transmitted by overnight mail, by electronic mail to Christopher.Lawrence@hq.doe.gov, or by facsimile to 202-586-8008.

FOR FURTHER INFORMATION CONTACT: Christopher Lawrence (Program Office) at 202-586-5260, or by e-mail to Christopher.Lawrence@hq.doe.gov

SUPPLEMENTARY INFORMATION: Exports of electricity from the United States to a foreign country are regulated by the Department of Energy (DOE) pursuant to sections 301(b) and 402(f) of the Department of Energy Organization Act (42 U.S.C. 7151(b), 7172(f)) and require authorization under section 202(e) of the FPA (16 U.S.C.824a(e)).

On July 19, 1999, the Department of Energy (DOE) issued Order No. EA-210 authorizing PPL EnergyPlus to transmit electric energy from the United States to Canada as a power marketer for a two-year term. DOE subsequently renewed that authority two additional times in Order No. EA-210-A on November 13, 2001 and in Order No. EA-210-B on August 17, 2007. The current export authority in Order No. EA-210-B will expire on August 17, 2012. On March 16, 2012, PPL EnergyPlus filed an application with DOE for renewal of that authority for an additional five-year term.

In its application, PPL EnergyPlus states that it “does not own any physical electric generation or transmission facilities in the U.S. and does not have any franchised service territory in the U.S.” Therefore, the electric power proposed to be exported to Canada will be surplus to the needs of the entities selling the power to PPL EnergyPlus. The application also indicates that PPL EnergyPlus is a power marketer authorized by the Federal Energy Regulatory Commission to sell energy, capacity, and specified ancillary services at market-based rates.

The existing international transmission facilities to be utilized by PPL EnergyPlus have previously been authorized by Presidential permits issued pursuant to Executive Order 10485, as amended, and are appropriate for open access transmission by third parties.

PROCEDURAL MATTERS: Any person desiring to be heard in this proceeding should file a comment or protest to the application at the address provided above. Protests should be filed in accordance with Rule 211 of the Federal Energy Regulatory Commission's (FERC) Rules of Practice and Procedures (18 CFR 385.211). Any person desiring to become a party to these proceedings should file a motion to intervene at the above address in accordance with FERC Rule 214 (385.214). Five copies of such comments, protests, or motions to intervene should be sent to the address provided above on or before the date listed above.

Comments on the PPL EnergyPlus application to export electric energy to Canada should be clearly marked with OE Docket No. 210-C. An additional copy is to be filed directly with Jesse A. Dillon, Esq., Senior Counsel, PPL Services Corporation, Two North Ninth Street, Allentown, PA 18101 AND Sandra E. Rizzo, Esq., Bracewell & Giuliani LLP, 2000 K Street NW, Suite 500, Washington, DC 20006 . A final decision will be made on this application after the environmental impacts have been evaluated pursuant to DOE's National Environmental Policy Act Implementing Procedures (10 CFR Part 1021) and after a determination is made by DOE that the proposed action will not have an adverse impact on the reliability of the U.S. electric power supply system.

Copies of this application will be made available, upon request, for public inspection and copying at the address provided above, by accessing the program website at <http://energy.gov/node/11845> or by emailing Angela Troy at Angela.Troy@hq.doe.gov.

Issued in Washington, D.C., on April 2, 2012.

Brian Mills
Director, Permitting and Siting
Office of Electricity Delivery and
Energy Reliability
